

PTL GROUP
MULTI-DISCIPLINARY MANAGEMENT IN CHINA

ASSEMBLY & MANUFACTURING IN CHINA

When trying to sell products in China, many companies find that import regulations and transportation barriers are hard to overcome, and therefore elevate the cost of their products.

One of the best solutions is transferring part of the product assembly and/or manufacturing process into China – without losing control over IP and important work processes. **PTL Group provides foreign companies with the following three options:**

1

CONTRACT MANUFACTURING

- A low-risk, light-commitment model that you can rely on, until you decide the time has come to set up your own manufacturing facilities.
- PTL Group takes care of some or all manufacturing aspects for you – from component procurement and product assembly in China to QC and shipping.
- Includes an initial assessment stage that assesses the cost of purchasing local components for your products and adjusts the final design to local market needs.

2

THE INDUSTRIAL INCUBATOR

- A small-scale manufacturing set up model, PTL Group's Industrial Incubator provides a quick and cost-effective solution to initiating local manufacturing or assembly in China.
- Provides customized production and assembly facilities that allow foreign companies to set up a manufacturing site or assembly factory in a controlled environment and with on-site managerial support services.
- **Key applications:** Manufacturing entity registration, management, hosting & control; Production & assembly line establishment and operation; Manufacturing licenses & all required certifications; Staff recruitment, training & supervision; QC processes set-up; HR & Finance support; Supply chain support; Engineering and product localization support.

3

FACTORY SET-UP

- A large-scale model for initiating and managing a comprehensive and robust manufacturing operation in China.
- PTL Group's local management team handles projects from the early fact-finding and government negotiation stages to construction supervision, equipment purchasing & assembly, talent search and staffing, on-the-job training and supervision of key positions during and after operation commissioning.
- **Additional services include:** Site selection; Procurement management; Blueprints, plan & design localization; Construction supervision; Equipment installation management; Financial management; HR management; Local entity operational set-up and mentoring.

Since 2000, PTL Group has provided international companies with management and operational support throughout their market entry and growth stages in China. As a trusted partner, we can help you create and manage a safe and controlled manufacturing environment.

**FOCUS ON YOUR CORE BUSINESS.
LET PTL GROUP TAKE CARE OF THE REST.**
